March 14, 2023 marked the beginning of a new era: Chat GPT-4 was released, fundamentally changing the way humans relate to language. In this talk, Professor Park will explore the implications of this pivotal moment, considering AI's impact on the production of works of fiction and on creativity more broadly.

Dr. Sowon Park is Associate Professor of English at UCSB. She specializes in Cognitive Literary Criticism and is Director of the Center for Literature and Mind.
